U.S. MANUFACTURING PARTNERSHIPS

Plan a U.S. production line

Define the product mix, expected demand and site requirements for a U.S. manufacturing partnership.

240 million tablets/year | **99% production yield** | **2,000 employees**

For facility operators, manufacturers and investment partners

Production and research network

Our network spans multiple production centers and R&D labs, with 30+ patent certifications and 200+ enterprise collaborations.

Assess the proposed site

Review location, utilities, construction needs, available skills and target volumes. Identify the equipment and quality work needed for the intended products.

Build your own line

SunTech helps you identify and source equipment, arrange training and define partner responsibilities for your site and planned production volume.
